Sprint Review Document – Sprint 1

1. Sprint Goals

To develop the basic functionalities of the Calendar Module pertaining to the schedule of orders.

2. Status Overview

2.1. Planned Items

- Order scheduling
- One-hour timeslot reservation for orders
- Specification file upload
- Automatic calculation of delivery day
- User authentication
- Weekly-calendar view of events

2.2. Finished and Unfinished Items

2.2.1. Finished

- Order scheduling
- One-hour timeslot reservation for orders
- Specification file upload
- Automatic calculation of delivery day
- User authentication
- Weekly-calendar view of events
- Events in calendar view with color-coded state
- List of available timeslots to select from
- Weekly list view of orders
- Show current state of orders

2.3. Added or Removed Items

2.3.1. Added

- Events in calendar view with color-coded state
- List of available timeslots to select from
- Weekly list view of orders
- Show current state of orders

2.3.2. Removed

- Maintenance scheduling
- Reparation scheduling
- Orders transference

3. Demo of Product

3.1. Things to show

- User authentication view
- Orders list view
- Events calendar view
- Orders scheduling
- Orders detail's view

3.2. Feedback from stakeholders

- Add CRONUS logo and brand details or colors to the views
- Prevents sales executive to change order creation and delivery date
- Prevents sales executive to put the number of pieces manually

4. Impediments

4.1. Problems we ran into throughout the sprint

- Lack of experience in chosen technologies

5. What's next?

5.1. New requirements or user stories.

- Select the services to perform in an order
- View the machine's workload in different branch offices
- Send notifications when an order is late for delivery
- Show orders grouped by service
- Select the number of pieces from predefined ranges
- Change the creation date of an order
- Show details of an order in calendar view
- Show orders in color-coded groups by the number of pieces in calendar view

5.2. Number of sprints left

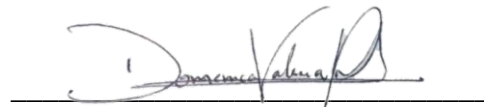

3

5.3. Project completion %

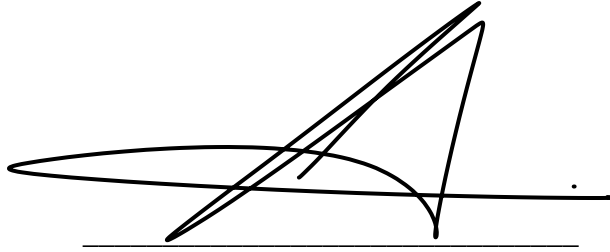

30%
